DETAILED ACTION

1. This is a notice of allowance in response to the appellant's communication filed on December 09, 2008.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. Authorization for this examiner's amendment was given in a telephone interview with Ray Salvagio Reg. No.: 59,983 on March 5, 2008. The application has been amended as follows:

In claim 1: line 4, replace "via" with --by--.

In claim 1: line 10; claim 10: line 16; claim 18: line 21; replace "state." with --state; wherein the command limits the access to a single user and the access is physical to an interface of the host computer.--.

In claim 15: line 10, replace "medium" with --storage medium.--.

Art Unit: 2437

In claim 15: line 15, replace "signature" with --signature; wherein the command limits the access to a single user and the access is physical to an interface of the host computer.--.

Reason for allowance

4. After consideration of the appellant's argument filed on December 09, 2008 in response to the Office Action mailed on August 06, 2008, and through examination of claims 1-2, 4-16, and 18-25 with respect to the prior art (Moran and Rowland) during the appeal conference and proposed examiner's amendment, claims 1-2, 4-16, and 18-25 have been found in condition for allowance over prior arts of record.

5. The following is an examiner's statement of reasons for allowance:

Claims 1, 10, 15 and 18 include the following features which are not taught or further suggested and would not have been obvious over prior arts of record and these features are: identifying a possible intrusion in a host and issuing a command to an operating system of said host to bring said host to a single user state wherein the command limits the access to a single user and the access is physical to an interface of the host computer.

The examiner considered and gave patentable weight for "a single user state" in light the applicant's disclosure as described in paragraph 0017 filed on February 23, 2004 which is " once an intrusion is detected an INIT 1 command is issued to the host system down to a single user state, whereby the INIT 1 command limits the access to a single user and the access is physical to the interface".

Art Unit: 2437

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See the notice of reference cited in form PTO-892 for additional prior art.

Contact Information

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Techane J.
